DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-10, 12-15, 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Klussmann et al. (US 6,143,833).

Klussmann et al. (Figure 2 and 3; col. 1, line 60-67; col. 2, line 45-67; col. 3, line 1-12; col. 3, line 45-65; col. 4, line 9-31; col. 4-5, claim 1) disclose a method of manufacturing a block copolymer comprising passing a block copolymerization product through first devolatilizer operated at a first low temperature to form a once devolatilized block copolymer product and then passing said once devolatilized block copolymer product from said first devolatilizer to a second devolatilizer operated at a second temperature to form a twice devolatilized block copolymer product. Klussmann et al. (col. 3, line 45-65) clearly indicate that the devolatilization process is performed at about 105 torr and temperature ranges from 140 to 150 °F.

Art Unit: 1713

Regarding the claimed "block copolymer" feature, applicants must recognize that the disclosed polymerization process involves the incorporation of polybutadiene into the disclosed styrene polymerization to result a copolymer having blocks of polybutadiene attached. Klussmann et al. contain all the limitation of claims 1-10, 12-15, 16-18 are anticipated.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. Claims 11, 19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Klussmann et al. (US 6,143,833).

Application/Control Number: 10/044,759

Art Unit: 1713

Set forth from paragraph 2 of instant office action, the invention of claims 11, 19 and Klussmann et al. are substantially identical because their preceding claims have been 102 rejected. Therefore, in view of the substantially identical processing conditions and polymeric system involves in the process, the examiner has a reasonable basis to believe that the claimed "maximizes foam formation" is inherently possessed in Klussmann et al. Since the PTO does not have proper means to conduct experiments, the burden of proof is now shifted to applicants to show otherwise. In re Best, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977); In re Fitzgerald, 205 USPQ 594 (CCPA 1980).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William K Cheung whose telephone number is (571) 272-1097. The examiner can normally be reached on Monday-Friday 9:00AM to 2:00PM; 4:00PM to 8:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David WU can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
